

Focus on Mathematics Seminar

Repurposing the Curriculum: Extendable Algebra and Number Theory Problems for grades 4–12

In this seminar we will explore a series of algebra and number theory problems that are accessible at the upper elementary and middle grade levels and extendable to all levels of high school. In the process of solving them we'll look at how approaches and topics at the most elementary level can be deepened, allowing students to extend their understanding to more challenging concepts.

Come and enjoy learning and collaborating with your fellow FoM colleagues. Teachers of all grade levels are welcome!

Presenter: Kent Werst,
Arlington High School

Date: Thursday, December 17

Time: 3:30 – 6:00 p.m.

Place: Arlington High School
869 Massachusetts Ave.
Arlington 02476

REGISTER by December 15th

To register, visit the online registration tool at

<https://secure.edc.org/cme/mathcp/registration/default.asp?mtgID=14>

or contact Melody Hachey at EDC

mhachey@edc.org or 617-618-2801

(enter through the main entrance, turn left, follow signs to the last room on the left. Room 305)
